Talking Over OUR STORY

Founded in 2018, Aldeko is built on a 40+ year legacy of excellence in construction by Vikanshu Petrochem. Our deep roots have earned us a reputation as a trusted leader in India's infrastructure development.

Innovative Products. We manufacture high-performance Aluminium & Metal Composite Panels (ACP), WPC LOUVERS, ACRYLUXE, WALLUXE & SOFFIT—designed to redefine modern aesthetics and unlock new architectural possibilities.

Built to Last. Our products deliver unmatched versatility, durability, weather resistance, and stunning visual impact for both interiors and exteriors.

Quality You Can Trust. Crafted in our advanced facilities in Kotdwar, Uttarakhand & Sonipat, Haryana, our panels meet global quality standards. We follow sustainable practices to minimize environmental impact.

Reliable, Always. With a strong distribution network and dedicated support team, we ensure seamless delivery, a wide range of finishes and designs, and unmatched customer care.

Your Success, Our Mission. Customer satisfaction drives us. Partner with Aldeko, and together, let's build something extraordinary.

WHAT IS

Walluxe Magma COLLECTION

Forged by Fire. Engineered to Endure.

Inspired by the raw power of molten earth, the Magma Collection transforms nature's strength into refined architectural surfaces. At its core lies a high-performance Aluminium Composite, delivering exceptional stability, durability, and lasting performance.

Wrapped in luxurious finishes, each panel reflects the timeless elegance of Marble, the natural warmth of Wood, and the bold sophistication of Metallic textures. Every design is crafted to capture the beauty of natural materials while offering the resilience demanded by modern architecture.

More than a surface, the Magma Collection is where engineering meets artistry—creating interiors that are as enduring as they are beautiful.

Forged Within. Designed Beyond.

TERMITE AND PEST PROOF

Unlike traditional wooden panels, Aldeko walluxe are impervious to termite and insect infestations. This eliminates the need for chemical treatments and provides peace of mind that your interiors are protected.

SEAMLESS INSTALLATION & ZERO MAINTENANCE:
 Aldeko walluxe are engineered for ultimate convenience. The "direct-to-wall" technology means they can be installed directly onto a clean, flat wall surface, eliminating the need for extensive preparatory work or a separate framework. This simplifies the process, reducing installation time and labor costs.

READY-TO-USE

The "ready-to-use" format means each panel comes pre-finished with a decorative layer, available in a variety of sophisticated designs, including realistic wood grains, marble, and contemporary textures. This eliminates the need for any additional finishing treatments like painting or polishing, making them maintenance-free and allowing for instant transformation of any space.

WLM-1302

FLEXIBLE AND BENDABLE

A key feature of these boards is their remarkable flexibility. They are designed to be 90-degree bendable, allowing for seamless and continuous application around corners without the need for additional joints, trims, or cutting. This innovation ensures a flawless, high-end finish, especially for intricate designs and curved surfaces.
